

CRS-related FAQs

(August 2015)

SECTION I: GENERAL REPORTING REQUIREMENTS
1. Reporting balance or value
<i>Question</i>
What balance or value of an Equity Interest should be reported where the value is not otherwise frequently determined by the Financial Institution (for example it is not routinely recalculated to report to the customer)?
<i>Answer</i>
The Standard defines the account balance or value in the case of an Equity interest as the value calculated by the Financial Institution for the purpose that requires the most frequent determination of value (Commentary to Section 1, A(4)). What this value is will depend on the particular facts. Depending on the circumstances it could, for example, be the value of the interest upon acquisition if the Financial Institution has not otherwise recalculated the balance or value for other reasons.
2. Aggregation and excluded accounts
<i>Question</i>
Are Excluded Accounts required to be included when applying the aggregation rules?
<i>Answer</i>
No. The aggregation rules refer to the aggregation of Financial Accounts (Section VII, C). The definition of Financial Accounts specifically excludes Excluded Accounts (Section VIII, C(1)).
3. Account Holder Information
<i>Question</i>
How does a Reporting Financial Institution report an individual that does not have both a first and last name?
<i>Answer</i>
The CRS schema requires the completion of the data elements for first name and last name. If an individual's legal name is a mononym or single name, the first name data element should be completed as "NFN" (No First Name) and the last name field should be completed with the account holder's mononym.

SECTIONS II-VII: DUE DILIGENCE REQUIREMENTS
1. Documentary Evidence
<i>Question</i>
Does the Standard require a Reporting Financial Institution to retain a paper copy of the Documentary Evidence collected as part of its due diligence procedures?
<i>Answer</i>
No. A Reporting Financial Institution is not required to retain a paper copy of the Documentary Evidence, but may do so (Paragraph 157 to the Commentary on Section VIII). A Reporting Financial institution may retain an original, certified copy, or photocopy of the Documentary Evidence or, instead, a notation of the type of documentation reviewed, the date the documentation was reviewed, and the document's identification number (if any) (for example, a passport number).
2. Residence address test – requirement to manually review Documentary Evidence
<i>Question</i>
Does the requirement in the Standard to confirm the residence address with the Documentary Evidence on file require accounts to be manually reviewed?
<i>Answer</i>
The Standard does not require a paper search to examine the Documentary Evidence. Generally, a requirement of the residence address test is that the residence address is based on Documentary Evidence (Section III, B, (1) and the associated Commentary). If a Financial Institution has kept a notation of the Documentary Evidence, as described above, or has policies and procedures in place to ensure that the current residence address is the same as the address on the Documentary Evidence provided, then the Reporting Financial Institution will have satisfied the Documentary Evidence requirement of the residence address test.

3. Residence address test – two residence addresses
<i>Question</i>
Is it possible that after the application of the residence address test it is determined that the Account Holder has two residence addresses?
<i>Answer</i>
Yes. Provided all the conditions for applying the residence address test are met (Section III, B, (1), and the associated Commentary), then it would be possible for the residence address test to result in two addresses being found. For example, with respect to a bank account maintained in Country A, a bank could have two addresses meeting the requirements in a case where a resident of Country B is working and living half her time in Country B and Country C. In this case a self-certification could be sought or the account could be reported to all Reportable Jurisdictions where there is a residence address.
4. Reliance on AML/KYC procedures for identifying Controlling Persons
<i>Question</i>
With respect to Pre-existing Entity Accounts with an aggregate account balance or value that does not exceed USD 1,000,000, what is the due diligence and reporting requirement in cases where the Financial Institution holds information on the names of Controlling Persons and no other information as it was not required to collect such information pursuant to applicable AML/KYC procedures?
<i>Answer</i>
The Standard provides that for accounts with a balance or value below USD 1 million (after applying the aggregation rules), the Financial Institution may rely on information collected and maintained for regulatory or customer relationship purposes, including AML/KYC procedures to determine whether a Controlling Person is a Reportable Person (Section V, D, (2), c)). Since, in the example given, the Financial Institution does not have and is not required to have any such information on file that indicates the Controlling Person may be a Reportable Person, it cannot document the residence of the Controlling Persons and does not need to report that person as a Controlling Person.

5. Obligations of a Financial Institution to establish tax residency

Question

What are the obligations under the Standard of a Financial Institution to establish the tax residency of its customers in relation to the New Account procedures?

Answer

A Financial Institution is not required to provide customers with tax advice or to perform a legal analysis to determine the reasonableness of self-certification. Instead, as provided in the Standard, for New Accounts the Financial Institution may rely on a self-certification made by the customer unless it knows or has reason to know that the self-certification is incorrect or unreliable, (the “reasonableness” test), which will be based on the information obtained in connection with the opening of the account, including any documentation obtained pursuant to AML/KYC procedures. The Standard provides examples of the application of the reasonableness tests (Section IV, A, and the associated Commentary).

The Standard also states that Participating Jurisdictions are expected to help taxpayers determine, and provide them with information with respect to, their residence(s) for tax purposes (Paragraph 6 of the Commentary to Section IV and Paragraph 9 of the Commentary on Section VI). The OECD is facilitating this process through a centralised dissemination of the information (on the Automatic Exchange Portal). Financial Institutions could also direct customers towards this information.

6. The Validation of TINs

Question

With respect to a Taxpayer Identification Number (TIN) provided on a self-certification, when will a Reporting Financial Institution know or have reason to know the self-certification is incorrect or unreliable?

Answer

The Standard provides that a Reporting Financial Institution may rely on a self-certification unless it knows or has reason to know that the self-certification is incorrect or unreliable (Section VII, paragraph A and associated Commentary). This includes, among the other information provided on the self-certification, the TIN in relation to a Reportable Jurisdiction. The Standard includes an expectation that Participating Jurisdictions will provide Reporting Financial Institutions with information with respect to the issuance, collection and, to the extent possible, the practical structure and other specifications of TINs (Commentary to Section VIII, paragraph 149). The OECD will be facilitating this process through a centralised dissemination of the information (on the Automatic Exchange Portal).

A Reporting Financial Institution will have reason to know that a self-certification is unreliable or incorrect if the self-certification does not contain a TIN and the information included on the Automatic Exchange Portal indicates that Reportable Jurisdiction issues TINs to all tax residents. The Standard does not require a Reporting Financial Institution to confirm the format and other specifications of a TIN with the information provided on the Automatic Exchange Portal. However Reporting Financial Institutions may nevertheless wish to do so in order to enhance the quality of the information collected and minimise the administrative burden associated with any follow up concerning reporting of an incorrect TIN. In this case, they may also use regional and national websites providing a TIN check module for the purpose of further verifying the accuracy of the TIN provided in the self-certification.

7. Self-Certification – meaning of “positively affirmed”
<i>Question</i>
A requirement for a self-certification to be valid on account opening under the Standard is that it must be signed or positively affirmed by the customer (Paragraph 7 to the Commentary on Section IV). How should “otherwise positively affirmed” be understood?
<i>Answer</i>
A self-certification is otherwise positively affirmed if the person making the self-certification provides the Financial Institution with an unambiguous acknowledgement that they agree with the representations made through the self-certification. In all cases, the positive affirmation is expected to be captured by the Financial Institution in a manner such that it can credibly demonstrate that the self-certification was positively affirmed (e.g., voice recording, digital footprint, etc.). The approach taken by the Financial Institution in obtaining the self-certification is expected to be in a manner consistent with the procedures followed by the Financial Institution for the opening of the account. The Financial Institution will need to maintain a record of this process for audit purposes, in addition to the self-certification itself.
8. Verbal self-certification
<i>Question</i>
Does the Standard allow for the gathering of information for a self-certification verbally on account opening under the Standard?
<i>Answer</i>
A self-certification may be provided in any manner and in any form (see for example Paragraph 9 to the Commentary on Section IV). Therefore, provided the self-certification contains all the required information (see for example Paragraph 7 to Commentary on Section IV) and the self-certification is signed or positively affirmed by the customer, a Financial Institution may gather verbally the information required to populate or otherwise obtain the self-certification. The approach taken by the Financial Institution in obtaining the self-certification is expected to be in a manner consistent with the procedures followed by the Financial Institution for the opening of the account. The Financial institution will need to maintain a record of this process for audit purposes, in addition to the self-certification itself.

9. Self-certification with yes/no response
<i>Question</i>
Does the Standard allow for a self-certification to solicit a yes/no response to questions about tax residence?
<i>Answer</i>
Yes. A self-certification can be completed based on a yes/no response to record the customer's jurisdiction(s) of tax residence, instead of requiring the completion of a blank field. The Standard does not prescribe how information on jurisdiction(s) of tax residence must be collected but provides that the information with respect to tax residence cannot be prepopulated (see paragraphs 7 and 8 to the Commentary on Section IV). For example, in order to complete a self-certification the customer could be asked whether the jurisdiction in which the account is being opened is the sole tax residence of the account holder, with additional questions only being asked if the answer is no.
10. Self-certification provided on the basis of a PoA
<i>Question</i>
Does the Standard allow for a self-certification to be provided by third party on the basis of a power of attorney?
<i>Answer</i>
If an Account Holder has provided that another person has legal authority to represent the Account Holder and make decisions on their behalf, such as through a power of attorney, then that other person may also provide a self-certification.

11. Reason to Know
<i>Question</i>
Should a self-certification contain language requiring the Account Holder to update the Reporting Financial Institution if there is a change in the information that affects the Account Holder's status?
<i>Answer</i>
<p>Although this is not a requirement under the Standard, a Reporting Financial Institution may want (or may be required to under a particular jurisdiction's domestic law) to include such language in self-certifications collected from its Account Holders as it may reduce the onus on the Reporting Financial Institution in applying the reasonableness test. Pursuant to the reasonableness test, a Reporting Financial Institution may not rely on a self-certification if it knows or has reason to know that the information contained on the self-certification is unreliable or incorrect. Commentary on Section VII paragraph 2-3.</p> <p>Jurisdictions may also consider including in their domestic law implementing the CRS a requirement on Account Holders to provide a self-certification to the Reporting Financial Institution and to inform the Reporting Financial Institution if there is a change to information contained in the self-certification that affects their status under CRS.</p>
12. New Accounts of Pre-existing Account Holders
<i>Question</i>
With respect to the allowance to treat certain New Accounts of a pre-existing customer as a Pre-existing Account, how broad is the requirement that the opening of the Financial Account does not require the provision of new, additional or amended customer information by the Account Holder other than for purposes of the CRS?
<i>Answer</i>
The Commentary provides that a jurisdiction may allow Reporting Financial Institutions to treat a New Account opened by an Account Holder that holds an account with the Reporting Financial Institution (or a Related Entity within the same jurisdiction as the Reporting Financial Institution) as a Pre-existing Account provided that certain conditions are met. Such conditions include that the opening of the Financial Account does not require the provision of new, additional or amended customer information by the Account Holder other than for purposes of the CRS. See Commentary to Section VIII, paragraph 82. This condition should be interpreted to include any instances in which the Account Holder is required to provide the Reporting Financial Institution with new, additional or amended customer information (as a result of a legal, regulatory, contractual, operational or any other requirement) in order to open the account. The rationale for this condition is that such instances provide an opportunity to obtain a self-certification together with new, additional or amended customer information as part of the opening of the account.

13. The relationship manager test
<i>Question</i>
How might the standard of knowledge test applicable to a Relationship Manager contained in the Standard be operationalised in practice?
<i>Answer</i>
The standard of knowledge test applicable to a Relationship Manager (for example, Section III, C(4) and the associated Commentary) could be operationalised through regular (e.g. yearly) instructions and training by a Financial Institution to all of its employees that could be considered Relationship Managers according to the Standard (Paragraphs 38 to 42 of the Commentary to Section III, C(4)). This could include the Financial Institution maintaining a record of a response made by each Relationship Manager stating that they are aware of their obligations and the channels to communicate any reason to know that an Account Holder for which they manage the relationship is a Reportable Person. These communications could then be centrally processed by the Financial Institution in the manner required by the Standard.
14. Reliance on Service Providers
<i>Question</i>
Does the Standard provide any restrictions on the use of a service provider to fulfil a Reporting Financial Institution's due diligence and/or reporting requirements under the CRS?
<i>Answer</i>
A jurisdiction may allow Reporting Financial Institutions to use service providers to fulfil their reporting and/or due diligence obligations. See Commentary on Section II, paragraph 6. The Standard does not require, for instance, that the service provider be within the same jurisdiction as the Reporting Financial Institution or obtain approval from the relevant jurisdiction to act as a service provider. The Commentary does provide that the Reporting Financial Institution must satisfy the requirements contained in domestic law and will remain responsible for its reporting and due diligence obligations (i.e., the actions of the service provider are imputed to the Reporting Financial Institution). To facilitate effective implementation, the jurisdiction must have access to the relevant records and evidence relied upon by the Reporting Financial Institution and service provider for the performance of the reporting and/or due diligence procedures set out in the CRS. See Commentary on Section IX, paragraphs 7-12.

15. Determination of CRS Status of Entities

Question

Which jurisdiction's rules should apply to determine an Entity's status?

Answer

The Commentary provides that an Entity's status as a Financial Institution or nonfinancial entity (NFE) should be resolved under the laws of the Participating Jurisdiction in which the Entity is resident. See Commentary on Section IX, paragraph 2. If an Entity is resident in a jurisdiction that has not implemented the CRS, the rules of the jurisdiction in which the account is maintained determine the Entity's status as a Financial Institution or NFE since there are no other rules available.

When determining an Entity's status as an active or passive NFE, the rules of the jurisdiction in which the account is maintained determine the Entity's status. However, a jurisdiction in which the account is maintained may permit (e.g. in its domestic implementation guidance) an Entity to determine its status as an active or passive NFE under the rules of the jurisdiction in which the Entity is resident provided that the jurisdiction in which the Entity is resident has implemented the CRS.

SECTION VIII: DEFINITIONS
A. REPORTING FINANCIAL INSTITUTIONS
1. Entities and Cash Pooling Activities
<i>Question</i>
<p>What is the CRS status of an Entity that regularly manages working capital by pooling the cash balances, including both positive and deficit cash balances, (<i>i.e.</i>, cash pooling) of one or more Related Entities that are primarily engaged in a business other than that of a Financial Institution and does not provide such cash pooling services to any Entity that is not a Related Entity?</p>
<i>Answer</i>
<p>To determine the CRS status of an Entity that engages in cash pooling it is necessary to consider whether the Entity is a Financial Institution, or more specifically a Depository Institution or an Investment Entity, or an NFE. The Standard defines a Depository Institution as an Entity that accepts deposits in the ordinary course of a banking or similar business. See Section VIII, subparagraph (A)(5) and Commentary on Section VIII, paragraph 12-14. For purposes of determining whether an Entity is a Depository Institution, an Entity that engages in cash pooling exclusively on behalf of one or more Related Entities will not be engaged in a banking or similar business by virtue of such activity.</p> <p>If the Entity is not a Depository Institution, the Entity may still be a Financial Institution if it meets the definition of an Investment Entity as set forth in Section VIII, subparagraph (A)(6), except such section specifically provides that an Investment Entity does not include an Entity that is an Active NFE because it meets any of the criteria in subparagraph (D)(9)(d) through (g).</p> <p>An Active NFE described in Section VIII, subparagraph (D)(9)(g) includes an NFE that primarily engages in financing and hedging transactions with, or for, Related Entities that are not Financial Institutions, and does not provide financing or hedging services to any Entity that is not a Related Entity, provided that the group of any such Related Entities is primarily engaged in a business other than that of a Financial Institution. See Section VIII, subparagraph (D)(9)(g). Since cash pooling is typically performed to reduce external debt and increase the available liquidity on behalf of Related Entities, cash pooling will be considered a financing transaction for purposes of the Active NFE definition. Therefore, an Entity that engages in cash pooling on behalf of one or more Related Entities that are not Financial Institutions and does not provide such cash pooling services to any Entity that is not a Related Entity, provided that the group of any such Related Entities is primarily engaged in a business other than that of a Financial Institution, will have the CRS status of Active NFE.</p>

2. Holding Company or Treasury Centre of Financial Group

Question

In what circumstances, if any, will a holding company or treasury centre of a financial group have the status of Financial Institution under CRS?

Answer

A holding company or treasury centre of a financial group will have the status of a Financial Institution if it meets the definition of Financial Institution provided in Section VIII, paragraph A. Thus, whether a holding company or treasury centre has the status of Financial Institution depends of the facts and circumstances, and in particular on whether it engages in the specified activities or operations of a Financial Institution (as defined in Section VIII, paragraph A.) even if those activities or operations are engaged in solely on behalf of Related Entities or its shareholders. An Entity that, for example, enters into foreign exchange hedges on behalf of the Entity's Related Entity financial group to eliminate the foreign exchange risk of such group, will meet the definition of Financial Institution provided that the other requirements of Investment Entity definition are met. A holding company will also meet the definition of Financial Institution, specifically, Investment Entity, if it functions as or hold itself out as an investment fund, private equity fund, venture capital fund, and similar investment vehicles if investors participate (either through debt or equity) in investment schemes through the holding company. See Commentary to Section VIII, paragraph 20.

3. Investment Entity

Question

In what circumstances will an Entity be managed by another Entity that is a Depository Institution, Custodial Institution, a Specified Insurance Company, or an Investment Entity described in Section VIII, subparagraph A(6)(a)?

Answer

The Commentary provides, for purposes of determining whether an Entity is an Investment Entity described in Section VIII, paragraph (A)(6)(b), that an Entity is managed by another Entity if the managing Entity performs, either directly or through a service provider, any of the activities or operations described in paragraph (A)(6)(a) on behalf of the managed Entity. These activities and operations include trading in money market instruments; foreign exchange; exchange, interest rate and index instruments; transferable securities; or commodity futures trading; individual and collective portfolio management, or otherwise investing, administering, or managing Financial Assets or money on behalf of other persons. Further, the managing Entity must have discretionary authority to manage the Entity's assets (in whole or in part). See Commentary on Section VIII, paragraph 17.

For example, a private trust company that acts as a registered office or registered agent of a trust or performs administrative services unrelated to the Financial Assets or money of the trust, does not conduct the activities and operations described in Section VIII, subparagraph (A)(6)(a) on behalf of the trust and thus the trust is not "managed by" the private trust company within the meaning of Section VIII, paragraph (A)(b)(6).

Also, an Entity that invests all or a portion of its assets in a mutual fund, exchange traded fund, or similar vehicle will not be considered "managed by" the mutual fund, exchange traded fund, or similar vehicle.

In both of these examples, a further determination needs to be made as to whether the Entity is managed by another Entity for the purpose of ascertaining whether the first-mentioned Entity falls within the definition of Investment Entity, as set out in Section VIII, paragraph (A)(6)(b).

4. Indirect Investment in Real Estate
<i>Question</i>
If an Entity's gross income is primarily attributable to indirect investment(s) in real property, will such Entity have the status of Investment Entity?
<i>Answer</i>
An Entity the gross income of which is primarily attributable to investing, reinvesting, or trading real property is not an Investment Entity (irrespective of whether it is professionally managed) because real property is not a Financial Asset. See Commentary on Section VIII, paragraph 17. If, instead, an Entity is holding an interest in another Entity that directly holds real property, the interest held by the first-mentioned Entity is a Financial Asset, and the gross income derived from that interest is to be taken into account to determine whether the Entity will meet the definition of Investment Entity under Section VIII, subparagraph (A)(6)(a)(iii) or paragraph (A)(6)(b). See Section VIII; subparagraph (A)(7) for the definition of Financial Asset.
B. NON-REPORTING FINANCIAL INSTITUTIONS
1. The status of a Central Bank/International Organisation/Governmental Entity
<i>Question</i>
Is it not inconsistent that a Central Bank, International Organisation or Governmental Entity can meet the requirements to be both classified as a Non-reporting Financial Institution and an Active Non-Financial Entity (NFE)?
<i>Answer</i>
How the Standard applies to a Central Bank, International Organisation or Governmental Entity will depend on the facts. The definition of NFE specifically excludes Financial Institutions (Section VIII, D(7)). The first test will therefore be whether the Central Bank, International Organisation or Governmental Entity qualifies as a Financial Institution. This is a functional test and depends on the facts. Where the Central Bank, International Organisation or Governmental Entity is determined to be a Financial Institution then it can be classified as a Non-reporting Financial Institution, provided it meets the requirements to be such in the Standard (Subparagraphs (1), (2), (3) and (4) of Section VIII, B, and the associated Commentary). Where the Central Bank, International Organisation or Governmental Entity does not meet the requirements to be classified as a Financial Institution then it will be a NFE and will be consequently classified as an Active NFE (Section VIII, D, (9) and the associated Commentary).

2. Low Risk Non-reporting Financial Institutions
<i>Question</i>
<p>What is the relationship between the jurisdiction specific categories of Low Risk Non-reporting Financial Institutions and the contents of Annex 2 to the FATCA Intergovernmental agreements (IGAs) being concluded with the US?</p>
<i>Answer</i>
<p>The categories of Non-Reporting Financial Institutions in the Standard (Section VIII, B and the associated Commentary) include some of the types of institutions contained in Annex 2 of the Model FATCA IGA. During the process of developing the Standard, however, it was decided that several of the categories in Annex 2 of the Model FATCA IGA were either not appropriate or not desirable in the context of the Standard and they were therefore not included. These are categories such as Treaty Qualified Retirement Funds, Financial Institutions with a Local Client Base, Local Banks, Financial Institutions with Only Low-Value Accounts, Sponsored Investment Entities and Controlled Foreign Corporations, Sponsored and Closely Held Investment Vehicles.</p> <p>There was a recognition, though, that there may be jurisdiction-specific Financial Institutions that could reasonably be understood to be similarly low risk to the categories included in the Standard but may nevertheless not be covered by the categories provided in the Standard. A residual category was therefore provided to allow Participating Jurisdictions to specifically identify these jurisdiction-specific low risk Financial Institutions as Non-Reporting Financial Institutions, provided they meet the requirements set out in the Standard (Section VIII, B, (1), c)) and the associated Commentary).</p>
3. Depository Accounts held by a Central Bank
<i>Question</i>
<p>A Central Bank is a Non-Reporting Financial Institution except with respect to a payment that is derived from an obligation held in connection with a commercial financial activity of the type engaged in by a Specified Insurance Company, Custodial Institution, or Depository Institution. See Section VIII; subparagraph B (1) (a).</p> <p>Will a Depository Account maintained by a Central Bank for its employee be considered an obligation held in connection with a commercial financial activity that will require the Central Bank to perform due diligence and reporting with respect to such account as a Reporting Financial Institution?</p>
<i>Answer</i>
<p>No. Depository Accounts held by a Central Bank for current or former employees (and the spouse and children of such employees) will not be considered held in connection with a commercial financial activity and thus the Central Bank will be a Non-Reporting Financial Institution with respect to such Financial Accounts.</p>

C. FINANCIAL ACCOUNT
1. Debt Interest
<i>Question</i>
<p>The Standard provides that the Financial Accounts of an Investment Entity are its debt and equity interests (Section VIII, C, (1), a) and the associated Commentary). What is the definition of a debt interest?</p>
<i>Answer</i>
<p>There is no definition of debt interest provided in the Standard.</p> <p>The Standard provides that if a term is not defined it shall have a meaning consistent with the local law of the applicable jurisdiction (Paragraph 2 of Section 1 of the Model Competent Authority Agreement). Therefore, the definition of debt interest is determined under local law of the implementing jurisdiction.</p>
2. Excluded Account
<i>Question</i>
<p>The Standard provides that a life insurance contract with a coverage period that will end before the insured individual attains age 90 is an Excluded Account provided the additional requirements described in Section VIII, subparagraph C(17)(c) are satisfied. Should this exclusion be read to cover term life insurance contracts?</p>
<i>Answer</i>
<p>Yes. The Standard includes as an Excluded Account certain term life insurance contracts that meet the conditions specified in Section VIII, subparagraph C(17)(c). See Commentary to Section VIII, paragraphs 86 and 91 which use the wording “term life insurance contract”.</p>

3. Excluded Account – Dormant accounts
<i>Question</i>
<p>The Standard provides, as an example of a Low-risk Excluded Account, a dormant account with an annual balance that does not exceed USD 1000. See Commentary on Section VIII, paragraph 103, Example 6.</p> <p>In light of the fact that the USD 1000 threshold is provided as an example, to what extent can jurisdictions electing to include dormant accounts as a Low-risk Excluded Account fix a higher threshold?</p>
<i>Answer</i>
<p>Even though the USD 1000 amount is only indicative it is expected that jurisdictions electing to include dormant accounts as a Low-risk Excluded Account do not fix a threshold that substantially exceeds this amount.</p>
D. REPORTABLE ACCOUNT
1. Reporting of certain Controlling Persons
<i>Question</i>
<p>Does an Entity’s Controlling Person(s) resident in the same jurisdiction as the Reporting Financial Institution need to be reported?</p>
<i>Answer</i>
<p>The Standard only requires the reporting of Reportable Jurisdiction Persons. Reportable Jurisdiction Persons are persons resident in a particular set of jurisdictions, as set out in the domestic implementing legislation of the Participating Jurisdiction where the Reporting Financial Institution is located (Section VIII, D, (3)). At a minimum, this list must include jurisdictions with which the Participating Jurisdiction has an agreement to automatically exchange information under the Standard. This would therefore not include persons resident solely in that Participating Jurisdiction itself.</p> <p>There is, though, an approach discussed in the Standard which would allow a Participating jurisdiction to extend reporting to cover their own residents that are Controlling Persons, although this is not a requirement of the Standard (Paragraph 5 of Annex 5 to the Standard).</p>

2. Passive Non-Financial Entities
<i>Question</i>
An Entity is an Active Non-Financial Entity if less than 50% of its income is passive income and less than 50% of its assets produce or are held for the production of passive income. What if the assets could produce passive income but do not actually produce any income in the period concerned?
<i>Answer</i>
The test of whether an asset is held for the production of passive income (Section VIII, D, (9), a) and the associated Commentary) does not require that passive income is actually produced in the period concerned. Instead, the asset must be of the type that produces or could produce passive income. For example, cash should be viewed as producing or being held for the production of passive income (interest) even if it does not actually produce such income.
3. Passive Income
<i>Question</i>
The CRS does not define passive income; however, the Commentary provides a list of items that should generally be considered passive income. The Commentary further provides that the determination of passive income may be made by “reference to each jurisdiction’s particular rules.” See Commentary on Section VIII, paragraph 126. In determining passive income, what is meant by the reference to each jurisdiction’s particular rules?
<i>Answer</i>
To facilitate effective implementation of the Standard, a jurisdiction’s definition of passive income should in substance be consistent with the list provided in the Commentary. Each jurisdiction may define in its particular rules the items contained in the list of passive income (such as, income equivalent to interest) consistent with domestic rules.

OTHER ISSUES
1. Data Safeguards – ISO-27000
<i>Question</i>
The Standard refers to the ISO-27000 series in relation to safeguarding data. It is a requirement of the Standard that the series is applied and, if so, is a certification required?
<i>Answer</i>
Rather than being prescriptive, the ISO-27000 series provide an approach to managing risk through best practice recommendations on information security management, risks and controls. The precise approach taken will be shaped by the context of the overall information security management system a tax administration has. Furthermore, there are other approaches that can be seen as providing equivalent protection. There is therefore an expectation that jurisdictions either apply the ISO 27000-series, an equivalent standard or have a reasonable justification of why it is reasonable to depart from it in the context of a particular tax administration. (References to the ISO-270000 series can be found in paragraph 13 to the Commentary on Section 3 and paragraph 12 to Commentary on Section 5 of the Model Competent Authority Agreement).
